A striking aspect of the distribution of potentially available cropland is that, from a regional perspective, much of Africa's unutilized arable land is found in just a few countries (Chamberlin et al., 2014, Deininger et al., 2011). Depending upon the definitions and assumptions used, as much as 90% of SSA's unutilized arable land is located in just 8 countries ().

In the past we have discussed how to combine value and momentum investing strategies to improve an equity allocation.. In this piece we discuss why an investor should combine value and momentum investing concepts.\* Many investors recognize that stand-alone value and momentum investment strategies have historically worked. Of course, these strategies don't work all the time and can have long ...

Diversification refers to the number of different securities in a fund. A fund with more securities is said to be better diversified than a fund with smaller number of securities. Owning many securities reduces volatility by decreasing the impact of large price swings above or below the average return in a single security.
