

constantin caratheodory pdf

Constantin Carathéodory (Greek: Κωνσταντίνος Καραθεοδωρίδης; 13 September 1873 – 2 February 1950) was a Greek mathematician who spent most of his professional career in Germany. He made significant contributions to the theory of functions of a real variable, the calculus of variations, and measure theory.

Constantin Carathéodory - Wikipedia

In mathematical analysis, a domain is any connected open subset of a finite-dimensional vector space. This is a different concept than the domain of a function, though it is often used for that purpose, for example in partial differential equations and Sobolev spaces.. Various degrees of smoothness of the boundary of the domain are required for various properties of functions defined on the ...

En mathématiques, une tribu ou σ -algèbre (lire sigma-algèbre) ou plus rarement corps de Borel [1] sur un ensemble X est un ensemble non vide de parties de X , stable par passage au complémentaire et par union dénombrable (donc aussi par intersection dénombrable). Les tribus permettent de définir rigoureusement la notion d'ensemble mesurable. ...
