Manual for the design of reinforced concrete building

Concrete, reinforcement, and formwork are the three primary expenses in cast-in-place concrete floor construction to consider throughout the design process, but especially during the initial planning stages. Of these three, formwork comprises about 55 percent of the total cost and has the greatest influence on the overall cost of the floor system.

The Design of Reinforced Concrete Slabs

This simplified reinforced concrete structure design program for architecture students, based on the American Concrete Institute Code (ACI 318-95), is expected to help architecture students to design sound concrete structures.
