In the section Ship Design Analysis we will examine what spacecraft warships will need, what they won't need, and what sort of tasks they will likely be required to perform. In the section Ship Types we will examine the thorny issue of the terminology of the various types of spacecraft.

Nuclear weapon designs are physical, chemical, and engineering arrangements that cause the physics package of a nuclear weapon to detonate. There are three existing basic design types: pure fission weapons were the first nuclear weapons built and have so far been the only type ever used in warfare.; boosted fission weapons improve on the implosion design. . Boosting can more than double the ...

In concurrent programming, an operation (or set of operations) is atomic, linearizable, indivisible or uninterruptible if it appears to the rest of the system to occur at once without being interrupted. Atomicity is a guarantee of isolation from interrupts, signals, concurrent processes and threads.It is relevant for thread safety and reentrancy. ...
