Journal of Applied and Computational Mechanics . Welcome to the online submission and editorial system for Journal of Applied and Computational Mechanics (JACM). The JACM is an open access, quarterly electronic journal which aims to provide an international forum for the exchange of analytical, computational and experimental works in all topics related to mechanical science and engineering.

Applied physics is intended for a particular technological or practical use. It is usually considered as a bridge or connection between physics and engineering. "Applied" is distinguished from "pure" by a subtle combination of factors, such as the motivation and attitude of researchers and the nature of the relationship to the technology or science that may be affected by the work.

Mechanics (Greek  $\mu\eta\chi\alpha\iota\kappa\eta$ ) is that area of science concerned with the behaviour of physical bodies when subjected to forces or displacements, and the subsequent effects of the bodies on their environment. The scientific discipline has its origins in Ancient Greece with the writings of Aristotle and Archimedes (see History of classical mechanics and Timeline of classical mechanics).

Applied Physics is the study of physics mathematics and engineering. Engineering physics can be seen as a tool for optimizing and developing a solution to some engineering problems and solving them with the knowledge of statistic, mechanics, engineering and combination of other discipline.

We are a close-knit community of faculty and students working toward solving challenges through applied mathematics, with the support of a staff dedicated to the department's mission. Our work is highly interdisciplinary and involves interaction with all of the other departments within the School of Engineering.
