1 There is much to consider when choosing the right retaining wall for your application. We have drawn on years of experience in the earth stabilisation business and put together a short checklist of seven

How to choose the right retaining wall for your project

A monopile foundation is a type of deep foundation which uses a single, generally large-diameter, structural element embedded into the earth to support all the loads (weight, wind, etc.) of a large above-surface structure.. A large number of monopile foundations have been utilized in recent years for economically constructing fixed-bottom offshore wind farms in shallow-water subsea locations.

Foundation (engineering) - Wikipedia

A gabion (from Italian gabbione meaning "big cage"; from Italian gabbia and Latin cavea meaning "cage") is a cage, cylinder, or box filled with rocks, concrete, or sometimes sand and soil for use in civil engineering, road building, military applications and landscaping.. For erosion control, caged riprap is used. For dams or in foundation construction, cylindrical metal structures are used.

Gabion - Wikipedia

Section -1 1Deep Foundations MEMO TO DESIGNERS 3-1 AUGUST 2013 LRFD DRFT 3-1 DEEP FOUNDATIONS Deep foundations are structural components that in comparison to shallow foundations transfer
