

geospatial and open source pdf

The Open Geospatial Consortium (OGC) is an international not for profit organization committed to making quality open standards for the global geospatial community. These standards are made through a consensus process and are freely available for anyone to use to improve sharing of the world's geospatial data.

Welcome to The Open Geospatial Consortium | OGC

The Open Geospatial Consortium (OGC), an international voluntary consensus standards organization, originated in 1994. In the OGC, more than 500 commercial, governmental, nonprofit and research organizations worldwide collaborate in a consensus process encouraging development and implementation of open standards for geospatial content and services, sensor web and Internet of Things, GIS data ...

Open Geospatial Consortium - Wikipedia

Below is a list of OGC Implementation Standards. Implementation Standards are different from the Abstract Specification. They are written for a more technical audience and detail the interface structure between software components.
