RF players stood out among the MEMS companies and showed impressive growth in 2015. Yole's analysts estimate that Avago Technologies had an increase of approximately 41% in BAW filters compared to 2014, as its FBAR technology was gradually adopted more widely by smartphone manufacturers.

2015 TOP 30 MEMS PLAYERS - Yole

Semi Networking Day Packaging Key for System Integration

The power of metals with additive manufacturing is the ability to produce complex geometries in one fluid build. Dense, corrosive resistant and high strength, we've validated and developed various metal materials for your unique application needs to create metal parts never seen before.

Exhibitor Products | WestPack 2019

A microarray is a multiplex lab-on-a-chip. It is a 2D array on a solid substrate (usually a glass slide or silicon thin-film cell) that assays large amounts of biological material using high-throughput screening miniaturized, multiplexed and parallel processing and detection methods. The concept and methodology of microarrays was first introduced and illustrated in antibody microarrays (also ...

Microarray - Wikipedia

Inkjet technology has the "power of innovation" that pioneers the future of various industries.

Inkjet Technology | Fujifilm Global

The thermal copper pillar bump, also known as the "thermal bump", is a thermoelectric device made from thin-film thermoelectric material embedded in flip chip interconnects (in particular copper pillar solder bumps) for use in electronics and optoelectronic packaging, including: flip chip packaging of CPU and GPU integrated circuits (chips), laser diodes, and semiconductor optical amplifiers ...

Japan Times reports that "Facial recognition technology will be used at the Tokyo 2020 Olympics and Paralympics to streamline the entry of athletes, officials and journalists to the games venues. In light of concerns about terrorism, the games's™ organizers aim to bolster security and prevent those involved in the 2020 Games from lending or borrowing ID cards.
