

professional portrait lighting techniques pdf

Portrait photography or portraiture in photography is a photograph of a person or group of people that captures the personality of the subject by using effective lighting, backdrops, and poses. A portrait picture might be artistic, or it might be clinical, as part of a medical study. Frequently, portraits are commissioned for special occasions, such as weddings or school events.

Portrait photography - Wikipedia

The addition of a fourth light, the background light, makes for a four-point lighting setup.. The background light is placed behind the subject(s), on a high grid, or low to the ground. Unlike the other three lights, which illuminate foreground elements like actors and props, it illuminates background elements, such as walls or outdoor scenery.

Three-point lighting - Wikipedia

Photographing Furniture Discusses the perceptual cause and effect of creating the illusion of 3D shape on reflective objects.It shows a minimalist approach for shooting furniture with only two lights, but the concepts also applies to lighting vehicles, jewelry and other reflective objects.
