Peer support services are delivered by individuals who have common life experiences with the people they are serving. People with mental and/or substance use disorders have a unique capacity to help each other based on a shared affiliation and a deep understanding of this experience. In self-help and mutual support, people offer this support, strength, and hope to their peers, which allows for ...

7.12.0 Introduction. In Australia, while the prevalence of smoking is declining in the general community, it remains high among people with mental illness. 1 Compared with the general population, people with mental illness have higher smoking rates, higher levels of nicotine dependence, and a disproportionate health and financial burden from smoking. 2, 3 Smokers with co-occurring mental ...

Psychiatry is at an important juncture, with the current pharmacologically focused model having achieved modest benefits in addressing the burden of poor mental health worldwide. Although the determinants of mental health are complex, the emerging and compelling evidence for nutrition as a crucial factor in the high prevalence and incidence of mental disorders suggests that diet is as ...
