Statistics for Business and Economics (12th Edition

Descriptive statistics is the branch of statistics that focuses on collecting, summarizing and presenting a set of data (Levine and Stephan, 2005). Descriptive statistics essentially aims to provide a better understanding of how frequent the data value, and how much variability there is around a typical value in the data (Fernandes, 2009).

(PDF) Statistics for Business and Economics - ResearchGate

This textbook is written for students of business and economics, so the examples and applications come from the world of business and economics. Most of the statistical techniques described in this book, however, are applied techniques that are used in other fields including medicine, sociology, psychology, and others.
