Common Core State StandardS for english Language arts

FORCES . A force is any push or pull that causes an object to move, stop, or change speed or direction.; The greater the force, the greater the change in motion will be. The more massive an object, the less effect a given force will have on the object.; Unless acted on by a force, objects in motion tend to stay in motion and objects at rest remain at rest.

Task Group reports On July 1, 2009, an NFPA task group issued a follow-up report on ionization vs. photoelectric smoke alarms (PDF, 9.2 MB). This report builds on the work of a 2008 task group report on ionization vs. photoelectric smoke alarms (PDF, 1.3 MB). Both task groups were convened to determine the best methods and practices for detecting smoke and to provide information to the technical ...
