Bivalirudin (Angiomax or Angiox, manufactured by The Medicines Company) is a direct thrombin inhibitor (DTI).. Chemically, it is a synthetic congener of the naturally occurring drug hirudin (found in the saliva of the medicinal leech *Hirudo medicinalis*).. Bivalirudin is a DTI that overcomes many limitations seen with indirect thrombin inhibitors, such as heparin.

Atherosclerosis is a disease in which the inside of an artery narrows due to the build up of plaque. Initially, there are generally no symptoms. When severe, it can result in coronary artery disease, stroke, peripheral artery disease, or kidney problems, depending on which arteries are affected. Symptoms, if they occur,

generally do not begin until middle age.

BackgroundIn patients with coronary artery disease who receive metallic drug-eluting coronary stents, adverse events such as late target-lesion failure may be related in part to the persistent presence of the metallic stent frame in the coronary-vessel wall. Bioresorbable vascular scaffolds have been developed to attempt to improve long-term outcomes.

Heart disease is the major leading cause of death and disability in the world. Mainly affecting the elderly population, heart disease and its main outcome, cardiovascular disease, have become an important risk factor in the development of cognitive decline and Alzheimerâ€™s disease (AD). This paper examines the evidence linking chronic brain hypoperfusion induced by a variety of cardiovascular ...
