Understanding, managing and applying for EPA grants. Find grant application forms, grant information, helpful hints, and guidance for EPA funding opportunities.

### **EPA Grants | US EPA**

A wetland is a distinct ecosystem that is inundated by water, either permanently or seasonally, where oxygen-free processes prevail. The primary factor that distinguishes wetlands from other land forms or water bodies is the characteristic vegetation of aquatic plants, adapted to the unique hydric soil. Wetlands play a number of roles, sometimes referred to as functions.

Status and Trends reports provide estimates of US wetland extent, type, and change specific to different time periods, ranging from the 1700s to 2009. Reports are currently being produced on a decadal basis. The reports educate policy-makers and the public on the status of the Nation's wetlands and potential causes of wetland change.
